Author index of volume 34

Adler, D.J., J.A. Herkamp, J.R. Wiesler and S.B. Williams, Life cycle costs and benefits of process automation in bulk pharmaceuticals 133–139

Adler, D.J., J. Herkamp, D. Henricks and R. Moss, Does a Manufacturing Execution System reduce the cost of production for bulk pharmaceuticals? 343–347

Ahmad, Z., *see* Dieu, B. 21– 28

Alagudu, M., *see* Vira, N. 101–116

Alexander, W.P., *see* Carter, D.K. 153–163

Anderson, T., *see* Saeed, A. 283–295

Baker, A.D., *see* Carter, D.K. 153–163

Beaudouin, F., J.M. Favennec and M. Piguet, Intelligent transmitters for process control – What, how, when, how much? A user's point of view 199–207

Boriani, D.V., Object-oriented Ada-based development of highly reusable control software 39– 51

Boriani, D.V., Axiomatic specification and logic programming: fast prototyping of correct designs 53– 65

Boriani, D.V., Knowledge-based system development tool selection for process control 141–151

Bristol, E.H., Not a batch language: A control language! 387–403

Bukowski, J.V. and W.M. Goble, Using Markov models for safety analysis of programmable electronic systems 193–198

Carter, D.K., A.D. Baker and W.P. Alexander, The I-I-Con: A visual communications paradigm to integrate industrial control system engineering 153–163

Cascetta, F., Short history of the flowmetering 229–243

Connelly, C.S., Toward an understanding of DCS control operator workload 175–184

Coppus, G. and A. Strashok, Manufacturing information systems for the process industry – Responding to the plant management challenges of the 90's 119–132

de Lemos, R., *see* Saeed, A. 283–295

Dieu, B., M.T. Garrett, Jr., Z. Ahmad and S. Young, Applications of automatic control systems for chlorination and dechlorination processes in wastewater treatment plants 21– 28

Douglas, III, F., *see* Taylor, R.P. 253–259

Dowell, III, A.M., *see* Green, D.L. 261–272

Favennec, J.M., *see* Beaudouin, F. 199–207

Fencott, C. and B.D. Hebbron, The application of HAZOP studies to integrated requirements models for control systems 297–308

Fujimoto, K., *see* Kimura, T. 319–326

Gall, H. and G. Rabe, International and European standardization for PLCs in safety critical systems – Qualification, type testing, certification and licensing 273–281

Garrett, Jr., M.T., *see* Dieu, B. 21– 28

Gibson, I.H., Optimal selection of thermowells 209–216

Gillespie, D.P., Comprehensive information management: EPA, OSHA and beyond 359–368
Goble, W.M., *see* Bukowski, J.V. 193–198
Green, D.L. and A.M. Dowell, III, How to design, verify and validate emergency shutdown systems 261–272
Gruhn, P., *see* Smith, S.E. 311–318
Guo, Y.Z., *see* Wang, F.Q. 87– 92
Gutierrez, H.M. and J.P. Rust, System identification for a photodiode-based measuring system 93– 99

Haxthausen, N., SP88 – The painkiller in validation 369–378
Hebbron, B.D., *see* Fencott, C. 297–308
Henricks, D., *see* Adler, D.J. 343–347
Herkamp, J., *see* Adler, D.J. 343–347
Herkamp, J.A., *see* Adler, D.J. 133–139

Jambhekar, V.N. and N.C. Ray, A completely automatic method for testing of magnetic materials 245–252
Jokinen, P.A., On the usage of spreadsheet packages for automating statistical process control tasks 29– 37

Kimura, T., T. Tanaka, K. Fujimoto and K. Ogawa, Hydrodynamic characteristics of a butterfly valve – Prediction of torque characteristics 319–326
Kimura, T., *see* Ogawa, K. 327–333

LaPack, M.A., *see* Walsh, M.R. 67– 85

Moss, R., *see* Adler, D.J. 343–347

Ogawa, K., *see* Kimura, T. 319–326
Ogawa, K. and T. Kimura, Hydrodynamic characteristics of a butterfly valve – Prediction of pressure loss characteristics 327–333

Pierre, D.A. and J.W. Pierre, Digital controller design – Alternative emulation approaches 219–228
Pierre, J.W., *see* Pierre, D.A. 219–228
Piguet, M., *see* Beaudouin, F. 199–207

Rabe, G., *see* Gall, H. 273–281
Ray, N.C., *see* Jambhekar, V.N. 245–252
Reklaitis, G.V., Scheduling approaches for the batch process industries 349–358
Romeu, F.J., Development of biotechnology control systems 3– 19
Rust, J.P., *see* Gutierrez, H.M. 93– 99

Saeed, A., R. de Lemos and T. Anderson, On the safety analysis of requirements specifications for safety-critical software 283–295
Sanders, F.F., Handling process disturbances and measurement errors 165–173
Shaw, J.A., How critical is your control system? 185–192
Smith, S.E. and P. Gruhn, The "primary integrity parameters" – Design parameters for safety systems 311–318
Steele, W.G., *see* Taylor, R.P. 253–259
Strashok, A., *see* Coppus, G. 119–132
Strobhar, D.A., Evolution of operator decision making 405–409

Tanaka, T., *see* Kimura, T. 319–326
Taylor, R.P., W.G. Steele and F. Douglas, III, Uncertainty analysis of rocket motor thrust measurements with correlated biases 253–259

Vira, N. and M. Alagudu, Precision measurements and control of an automated two-dimensional grid plate testing machine 101–116

Walsh, M.R. and M.A. LaPack, On-line measurements using mass spectrometry 67– 85
Wang, F.Q., Y.Z. Guo and X.Z. Zu, Influence of different excitation methods on vibration calibration 87– 92
Webb, M., Computer system implementation, batch standards and validation 379–385
Wiesler, J.R., *see* Adler, D.J. 133–139
Williams, S.B., *see* Adler, D.J. 133–139

Young, S., *see* Dieu, B. 21– 28
Young, S.L., Technology ... The enabler for tomorrow's agile enterprise 335–341

Zu, X.Z., *see* Wang, F.Q. 87– 92
